THE VALUE OF REGISTRATION FOR
TRUST FRAMEWORK PROVIDERS & COMMUNITIES OF INTEREST

OIXnet Launch: OpenID Connect Certifications

⟳ OpenID Foundation registers OpenID Connect certifications at OIXnet

- http://oixnet.org/openid-certifications/

- http://openid.net/certification/

⟳ Early adopters first to certify and register for pilot launch

The Value of a General Purpose Registry

Disclosure

Transparency builds trust

Technical information needed to be compliant

Business information needed to be registered

Discovery

More effective: requirements are easier to find and be found

More efficient: non-profit; multi-tenant; multi-sector

Faster: amplification of requirements

Centralized

Comparability across registrations

Compliance with registration requirements

Equivalency of registrations

The Value Proposition for TFPs/COIs

- Accelerates go to market timelines

- Speeds adoption of business, legal and technical requirements

- Enables interoperability & discovery

- Extends the reach of the TFP/COI beyond it's membership

- Provides a quality assurance/quality control platform

- Enhances trust through transparency

- Build vs. buy opportunity costs

- Leverages OIX's legal investment and liability research

Two-Types of Information Required for Registration

Business Information Needed to be Registered

OIX is solely responsible for all enrollment requirements

Consistent across all registrations

Technical Information Needed to be Compliant

COI's/TFP's are solely responsible for all business, legal and technical requirements

Unique for each TFP/COI

TFP/COI defines these requirements

All enrollment fields are required for registration

Registration: How It Works

- This registration workflow assumes the the TFP requires participating organizations to be certified and registered to participate in the trust framework
- In this use-case, the TFP/COI will be registering these certifications at OIXnet on behalf of members/participants
- TFPs/COIs may require something other than a certification to be registered at OIXnet
- Some TFPs/COIs may only register their requirements and not require members/participants to register
